**Use of Methi (*Trigonella foenum-graecum*) based preparation (TML) through ST-196 in treatment of Type II Diabetes.**

**Pankaj Oudhia**

**Introductory Note**

In Traditional Healing, use of Methi with Indigenous Herbs and Traditional Formulations play vital role. The Traditional Healers of Indian state Chhattisgarh use it in treatment of Type II Diabetes and associated diseases with the help of Special Treatment 196. They use it in form of 52 weeks schedule in four sets. I have documented this Traditional medicinal knowledge and added it in Type II Diabetes report in Ecoport.

Recent Ethnobotanical surveys resulted in new information and based on it I prepared modified schedules by adding new herbs and herbal combinations. The basic as well as modified schedules are present in CGBD database. The efforts are in progress to make CGBD database online. The present documents show basic and modified schedule no.1.
